DETAILED ACTION

This action is a response to applicants' application filed January 31, 2001.

Claim Rejections - 35 USC § 112

The use of the trademarks PLURONICS and MATRIGEL, have been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks. However, the trademarks cannot appear in the claims. The examiner suggests use of the generic terminology.

Claim 17 is objected to because of the reasons stated above. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 3731

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 40-43 and 45-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Butler et al (US Patent 5,980,889) in view of Stensaas et al (US Patent 4,778,467). The patent to Butler et al discloses a method for regenerating nerves with use of a cell-encapsulating device. The latter reference suggests use of a roll device also for the regeneration of nerves.

It would have been within the purview of one having ordinary skill in the art to provide Butler et al with the roll device of Stensaas et al so as to wrap the nerve ends for tighter grip rather inserting the ends into a grip.

Allowable Subject Matter

Claim 44 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

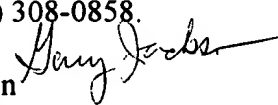

Claims 1-39 are allowable over the art of record.
